ONSITE CUSTOM TRAINING

Machine Specific Training:

Are you an equipment designer or manufacturer (OEM)?
Did you realise that you are obliged to have available operator
and maintenance training for your equipment?

If you don't have the in house ability to provide this we can help!
We have vast experience in providing Electrical,
Mechanical and Hydraulic training courses and manuals specific to
equipment – let us handle the training to let you do what you do best!

Are you an equipment owner?

Let us tailor a training package to suit you specific
equipment and site requirements – it's easy and hassle free.

**The following courses are available off the shelf.
Other training programs can be delivered on
request:**
